

Seasearcher

Get the complete view of the world fleet

Live. Connected. Trusted.

Knowledge is power

You need to know what's going on in the maritime World. It's essential to mitigate risk, stay compliant and grasp commercial opportunities. But cutting through the clutter to uncover trustworthy data and actionable insight can seem like a daunting task.

Seasearcher

The world's most comprehensive suite of tools for tracking and understanding seaborne trade.

Built using the best data from Lloyd's List Intelligence, Seasearcher is an online suite of vessel intelligence tools, essential to everyone with a stake in the maritime industry. Save time, simplify your workflows, and base your decisions on a clear view with everything you need, from one trusted source.

Get a clear view of risk

Move quickly with actionable insight
to assess risk and stay compliant

Complete compliance checks, quickly and simply

Automated compliance risk assessment
tools simplify your workflow and quickly
flag potential issues

Detect sanctions risk

Be aware of high risk players, with
risk ratings and sanctions alerts

Confirm illicit activity, fast

Get a clear and unbiased view of vessels and
assess your exposure to risk, with contextual
analytics that can flag suspicious behaviour,
even with AIS turned off

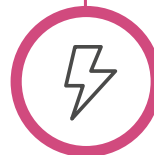

Don't waste time

Avoid unnecessary investigations with
intelligence that highlights when an anomaly
or AIS gap might result in a compliance risk

Stay informed of casualties and incidents

Understand where and when they happen
alongside arrests and detentions

Know your customer

Understand complex company ownership
structures with in-depth company data

Monitor maritime trade and seize opportunities

Increase efficiency and act on clear insight with a comprehensive understanding of shipping patterns and real-time operations

Identify supply and demand shifts

Global trade data helps you spot patterns and anticipate changes

Know which vessels are where

Vessel movements data gives you a view of the global fleet and where they are going

Track containers

Simplify transshipment tracking with end-to-end downloadable data trails on containers

Act quickly and stay ahead

Automated alerts and predicted data inform you of relevant changes and keep you ahead of your competitors

Set your strategic direction based on solid insight

Get context for your plans and decide where to focus your efforts with a clear view of the market and detailed customer knowledge

Understand the shape and make-up of the global fleet

World fleet data helps you pinpoint opportunities

Anticipate the effects of geopolitical events

Monitor how the industry is changing in unpredictable times

Find out what your competitors are doing

Company fleet and activity data keeps you on the front foot

Optimise shipping routes and avoid wasting unnecessary fuel

Reliable and accurate predicted voyage data helps you to plan ahead with confidence

Build cases on trustworthy data

Evidence vessel ownership and movements on reliable data from a single, trusted source

Download case ready documentation

PDF reports support your investigations

Present your cases with confidence

Verified vessel positions ensure you are working with accurate data

Simplify complex ownership structures

Company data allows you to find what you need quickly

Seasearcher: Tailored to you

To help you harness its full power, Seasearcher is available with sector specific subscriptions. Each one has a specially selected group of features designed to solve your department's problems and make your workflows simpler, quicker and more rigorous.

Seasearcher core tools

Built on the best data from Lloyd's List Intelligence, Seasearcher is the vessel intelligence tool trusted by maritime professionals all over the world. Stay informed with live vessel movements data, ports and places data, tailored alerts, company ownership details and downloadable reports.

Seasearcher core tools form the foundation on which all of our tailored subscriptions are built.
Seasearcher core tools include.

Vessel positions

Verified data on a ship's location and port call history

Vessel characteristics

Reliable information on a vessel's attributes

Ports & places

First-hand intelligence and verified port callings

Downloadable reports

Download and use for your internal due diligence processes

Vessel lists and alerts

Monitor and stay informed of characteristic changes and movements in real time

Companies & ownership

Understand complex ownership structures with up to 7 levels of ownership

Seasearcher Risk & Compliance

“We have found online access to Seasearcher an extremely valuable tool to ensure adherence to our sanctions and compliance responsibilities. Information is detailed, accurate, up-to-date and in an easy to use format. From our experience, it is much superior to other programmes available.”

Trade Finance Analyst

London bank, operating in the African market

Our set of compliance risk detection features enable you to quickly spot potential risk needing further investigation. Complete due diligence and protect your organisation from the consequences of illicit activity with intelligent tools that go beyond the raw data and help you understand when a pattern or series of events should raise your suspicions.

Seasearcher Risk & Compliance includes

Seasearcher core tools

Access essential maritime intelligence data (see page 7)

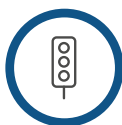

Incidents and casualty reporting

Stay informed of casualties, seizures, arrests, inspections and detentions

High risk port call indicators

Stay informed of vessel callings in high risk, Joint War Committee war risk areas or ECA zones

Instant compliance risk indicators

Get an instant "big picture" indication of risk associated to a vessel

Vessel timelines

Review interactive onscreen timelines with all key events and characteristic changes linked to a vessel

Automated watchlists

Upload and screen vessels, companies and places automatically against your own lists

AIS gap notifications and alerts

Detect AIS gaps and if they occur in high-risk locations

Projected destination tracking

Get a clear indication of where a vessel may have travelled during 'dark' periods

Ship to ship operations

Identify vessels that frequently pair with your vessel of interest

Sanctions screening and alerts

A clear view of current and historic sanctions

Spoofing detection

Stay alerted to vessels that transmit false AIS data to conceal their real location

Loitering

Detect suspicious loitering behaviour in associated with high risk area movement and draught changes

Seasearcher Advanced Risk & Compliance

Access a new view of validated maritime trading risk and context on which to base and evidence compliance decisions. Seasearcher Advanced Risk & Compliance gives you a level of insight previously unattainable, enabling you to save time and effort completing sanctions compliance checks and validating what turn out to be false positives.

Seasearcher Advanced Risk & Compliance includes

Seasearcher core tools

Access essential maritime intelligence data (see page 7)

Seasearcher Risk & Compliance

Essential risk detection features (see page 9)

Screened vessel lists

Upload and share screened vessel lists to create company audit trails

Dark STS detection (1-way and 2-way)

Identify and review detailed insight on probable dark STS pairings, even when one or both vessels are not transmitting AIS

Abnormal movements

Detect vessels behaving in an abnormal way, including illicit activity such as 1-way dark STS transfer

Dark port call detection

Detect whether a vessel could have called at a high-risk port even when AIS is disabled

Tailored risk scores

Avoid unnecessary investigations with instant risk score indicators based on the vessel's profile and detected voyage risk

Tailored compliance reports

Downloadable reports that include all events, risk ratings and voyage maps

Enhanced AIS Gap Detection

Avoid wasting time with intelligence that distinguishes between a signal loss and vessel deliberately disabling AIS

Continuous monitoring lists, with alerts

Get alerted to any changes in the risk profile of your vessel or fleet of interest

Trading insights

View the trading profile of a vessel in context with its risk

Comprehensive voyage event logs

A single view of a vessel's voyage, marking all key events such as port calls, draught changes, destination changes, abnormal movements, AIS gaps, high-risk area entries, dark STS and dark port calls or chokepoint passing

Comprehensive compliance filters

Screen and investigate vessel risk using filters on vessel sanctions, ownership, flag, AIS manipulation, risk rating and voyage risk

Centralised escalation

Receive escalations from other Seasearcher users and complete your risk investigations on one platform

Predicted destination

70% accuracy, 5 days out

35 percentage points increase
over standard AIS destination

Seasearcher Predictive Fleet Analytics

Access a new level of reliable and accurate voyage data to cut costs, maximise operational efficiency and serve customers better. Predictive Fleet Analytics combines machine learning with trusted foundational data to predict a vessel's next move with estimated times on arrival, berthing, departure, port congestions and turnaround times in a market-first platform and API end point.

Seasearcher Predictive Fleet Analytics include

Seasearcher core tools

Access essential maritime intelligence data (see page 7)

Predicted destination

Get alerted to destination changes and proactively reach out to customers for sales opportunities

Estimated Time of Arrival (ETA)

Know when a vessel will arrive at a destination port to plan operations efficiently

Estimated Time to Berth (ETB)

Proactively make arrangements with the knowledge of port congestions and expected time delays

Estimated Time of Departure (ETD)

Get full visibility on vessel departures based on historical and current traffic levels

Vessel predicted waiting time and time in port

Optimise shipping routes to avoid penalties and wasting time

Vessel predicted voyage

Quickly understand a vessel's future route with clear visualisation on a map including current speed changes

Tailored email alerts

Get alerted to changes in vessel destination to stay ahead of your competitors

Vessel operating information

Make better decisions knowing a vessel's historical trading information and timeline including risk events

Trade route analytics

Pinpoint opportunities by analysing current and historical trading for vessels travelling between two ports, or to specific countries or places

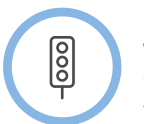

Port traffic analytics

Proactively seize opportunities knowing which vessels are expected to arrive at the port within the next 5 days

Port benchmark data

Benchmark port performance for competitive insights and optimising shipping routes

Port congestion and turnaround metrics with red, amber, green rating

Quickly derive expected waiting times by vessel types and sizes to advise captains to slow steam or speed up

Seasearcher Container Tracker

Simplify your checks and inform your decisions with clear knowledge of exactly where a container has been, even if it has transhipped on multiple vessels. Container tracker is a unique, on-demand solution that lets you access complete and verified container movement data. Get an end-to-end audit trail with exportable reports, all at the touch of a button.

Seasearcher Container Tracker includes

Seasearcher core tools

Access essential maritime intelligence data (see page 7)

Bill of Lading and container number verification

Find the container you need with worldwide coverage

Transhipment reports

Track container transhipments on screen with easy to export reports

Voyage outlines

Get onscreen maps of a container's journey

Port callings data

Ascertain ports of load and discharge

Downloadable reports

Evidence your findings

Sanctions indicators*

Understand if a vessel is linked to a sanctioned owner or company

Transhipment query service*

Get researched answers to your transhipment questions from an experienced team of maritime experts

High risk port call indicators*

Stay informed of vessel callings in high risk, Joint War Committee war risk areas or ECA zones

*Available for an additional cost

Seasearcher Trade Risk

Complete fast and accurate dual-use goods screening and price verification checks, enhancing your due diligence processes and mitigating the threat of trade-based money laundering risk within trade transactions. Seasearcher Trade Risk empowers you to conduct more thorough and efficient risk assessments, safeguards your organisation against fraud and protects you from the severe consequences of non-compliance.

Seasearcher Trade Risk includes

Streamlined, efficient workflow

Screen a maximum of 5 goods per transaction; some documents contain multiple goods

Dual use goods screening

Verify shipment descriptions to detect dual use goods and mitigate risk

Price verification

Input prices to view historical fluctuations; detect fraudulent valuation of goods

Goods-vessel compatibility

Check if the vessel is appropriate for the goods types

Trade route anomaly screening

Receive alerts when similar historical trade routes cannot be detected

Downloadable reports

Ensure evidence is collected for audit trail requirements

Centralised control lists

Screen for dual use goods risk with access to 21 export control lists

Machine-assisted research

Reduce false positives with match phrases correlating to dual use goods

Global pricing coverage

Access trade data from all countries and HS codes up to 13 digits

Seasearcher Insurance

Get a complete view of risk so you can price it accordingly and know your customers, and their customers, to ensure sanction compliance. Our risk detection and assessment features are designed to simplify your workflows and get to the data you need quickly.

Seasearcher Insurance includes

Seasearcher core tools

Access essential maritime intelligence data (see page 7)

Incidents and casualty reporting

Stay informed of casualties, seizures, arrests, inspections and detentions

Hull risk indicators

Get a clear, unbiased view of a vessel's risk and operational history

Instant compliance risk indicators

Get an instant "big picture" indication of risk associated to a vessel

Vessel timelines

Review interactive onscreen timelines with all key events and characteristic changes linked to a vessel

Automated watchlists

Upload and screen vessels, companies and places automatically against your own lists

AIS gap notifications and alerts

Detect AIS gaps and if they occur in high-risk locations

Projected destination tracking

Get a clear indication of where a vessel may have travelled during 'dark' periods

Ship to ship operations

Identify vessels that frequently pair with your vessel of interest

High risk port call indicators

Stay informed of vessel callings in high risk, Joint War Committee war risk areas or ECA zones

Sanctions screening and alerts

A clear view of current and historic sanctions

Loitering

Detect suspicious loitering behaviour in associated with high risk area movement and draught changes

Casualty alerts

Monitor and track casualties globally

Seasearcher Vigilance

(Non-secure and secure government agencies only)

Monitor the maritime domain and quickly spot suspicious behaviour so you escalate investigations and support mission critical activities.

Seasearcher Vigilance includes

Seasearcher core tools

Access essential maritime intelligence data (see page 7)

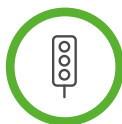

Incidents and casualty reporting

Stay informed of casualties, seizures, arrests, inspections and detentions

Vigilance

Get a clear view of significant events and vessel behaviour to intensify your maritime domain effectiveness

Instant compliance risk indicators

Get an instant "big picture" indication of risk associated to a vessel

Vessel timelines

Review interactive onscreen timelines with all key events and characteristic changes linked to a vessel

Automated watchlists

Upload and screen vessels, companies and places automatically against your own lists

AIS gap notifications and alerts

Detect AIS gaps and if they occur in high-risk locations

Projected destination tracking

Get a clear indication of where a vessel may have travelled during 'dark' periods

Ship to ship operations

Identify vessels that frequently pair with your vessel of interest

High risk port call indicators

Stay informed of vessel callings in high risk, Joint War Committee war risk areas or ECA zones

Sanctions screening and alerts

A clear view of current and historic sanctions

Loitering

Detect suspicious loitering behaviour in associated with high risk area movement and draught changes

Seasearcher Credit Risk

Get a clear understanding of the financial position of your customers so you can make informed credit decisions and plan for growth with a clear view of new business opportunities.

Seasearcher Credit Risk includes

Seasearcher core tools

Access essential maritime intelligence data (see page 7)

Downloadable credit reports

Comprehensive data on an organisation's financial operating structure, financial position and credit rating

AIS gap detection

Understand if a vessel has gaps in its AIS history

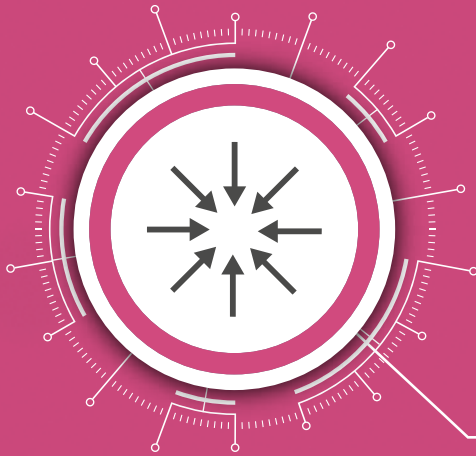

Sanctions screening and alerts

A clear view of current and historic sanctions

High risk port call indicators

Stay informed of vessel callings in high risk, Joint War Committee war risk areas or ECA zones

Lloyd's List Intelligence Data Services

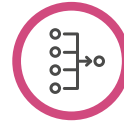

Integrate best in class maritime data directly into your own workflow or applications with a range of flexible delivery options.

Lloyd's List Intelligence Data Services includes

Get the complete view

Access the most comprehensive tracking data with a complete view of vessel movements, detailed ownership data and sanctions information available from all major sources

Combine your data into one system

Integrate data with your own to provide you with a complete single source

Integrate, effortlessly

Real time data integration into your internal system provides the current view

Save time conducting analysis

One integrated source reduces time spent collating data and gives you more time to analyse and act on it

See only the data you need

Select the data and update frequency you need across the range of API endpoints

Near real-time global AIS data & intelligence

View the most up to date, trusted, reliable and independent view of data every second

Bespoke pricing

Pay for the data you need and nothing else

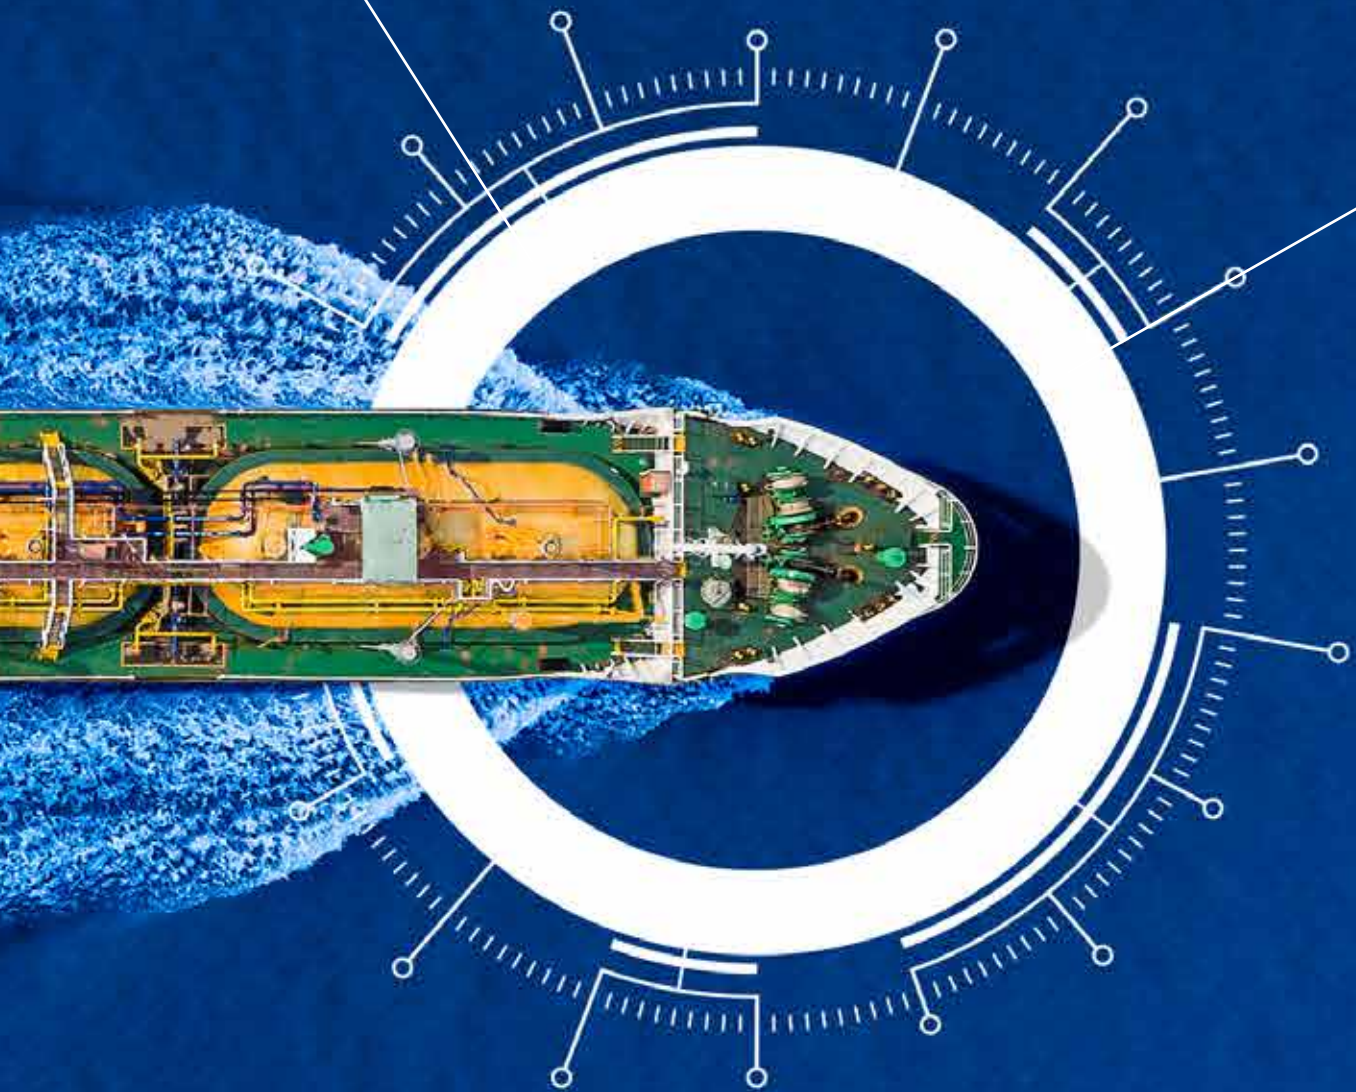

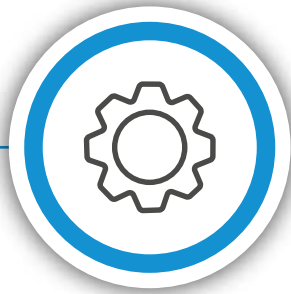

Get advice from experts

If you have questions about the data, contact our maritime data experts to provide additional insight and get answers within 24 hours

Seasearcher is powered by Lloyd's List Intelligence

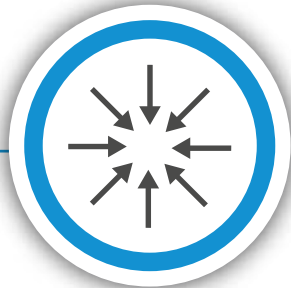

We have a robust framework to measure and continuously improve the quality of our data sets.

Consistency

Our methodologies use strict rules and defined tolerances to manage consistency

Origin

Our data is built on the most reliable inputs from our own exclusive sources and partners that we trust

Accuracy

We are constantly monitoring and testing our data sets, removing anomalies, driving accuracy and increasing precision

Completeness

We give you the most complete view and are continually growing our coverage

Timeliness

Automated processes and data handling ensure our data is current and quickly accessible
